Personal Summary:

- + Over 10 years experience in creating interactive solutions and design
- + Works well in creative team environment and equally as well independently
- + Client savvy
- + Self-starter, high energy and motivated
- + Disgustingly obsessed with interactive design and motion graphics
- + Intense love of challenges, learning and new ideas

Work Summary:

I design, develop and produce Motion Graphics and Animation that is delivered in a multitude of mediums; Flash, PowerPoint, video, web, CD-ROM, and DVD. Individual programming and production work is completed with After Effects, Final Cut Pro, Flash, Actionscript, Sound Forge, Photoshop, and Dreamweaver. The work flow includes managing freelancers and reviewing their contributions, as well as working with Art Directors to design and develop projects that touch a number of wide ranging competencies; from taking existing audio and video, and rolling it into something new, or starting from scratch - story board, art direction, production and delivery. I collaborate with clients co-workers to assess their needs, and then create the best solution based on time constraints, budget, and project requirements. Timelines and budget estimates are assessed to build out the proper team to complete the project within these parameters.
